

Import scripts to SQLed

1. Create a Project

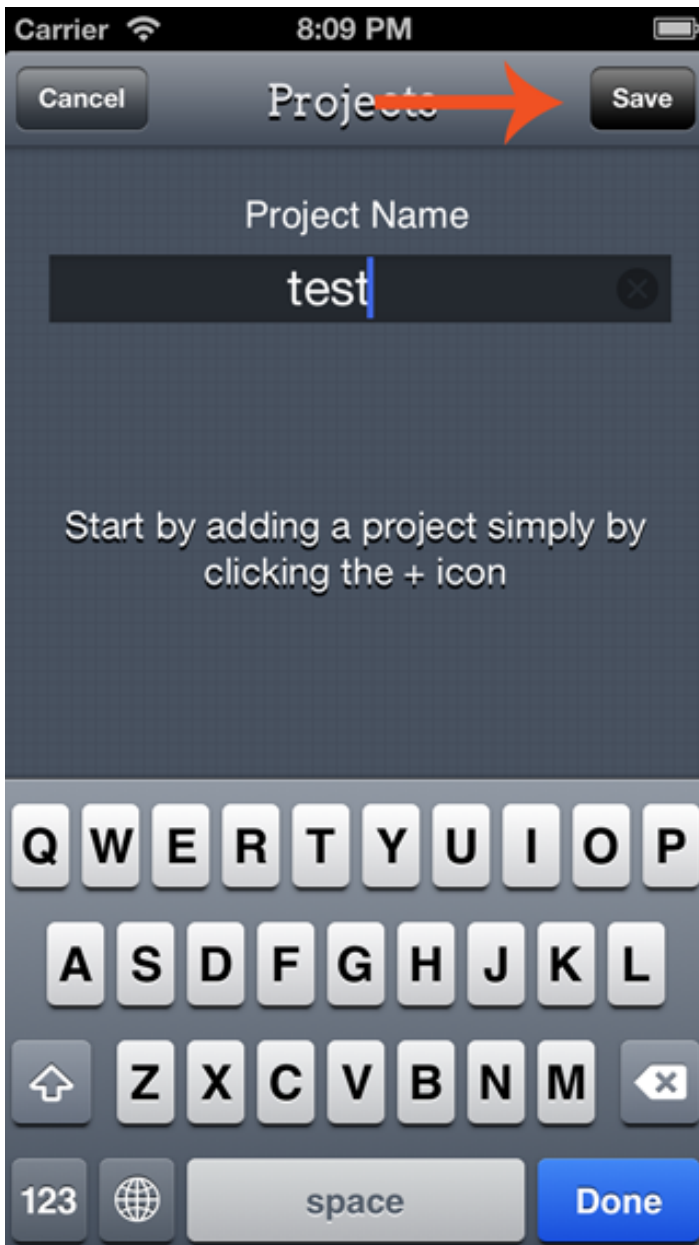

Tap on the + icon on the bottom right of the Screen

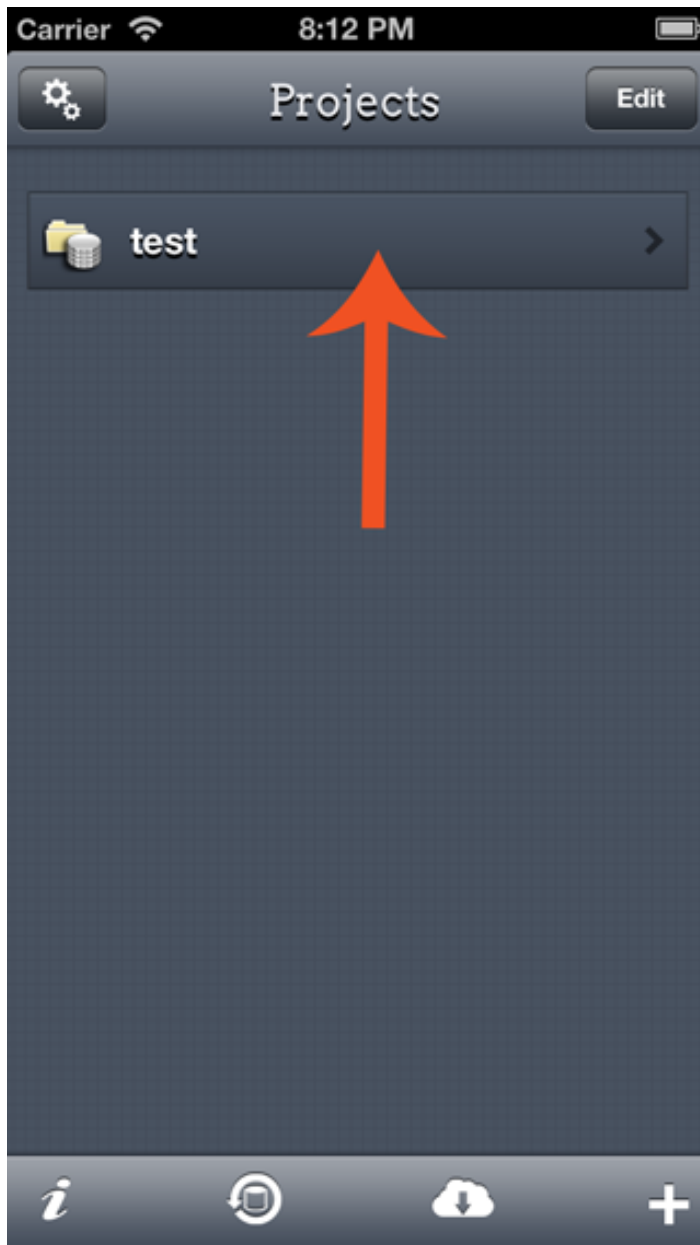

Enter a name for the project

Tap on save to create the project

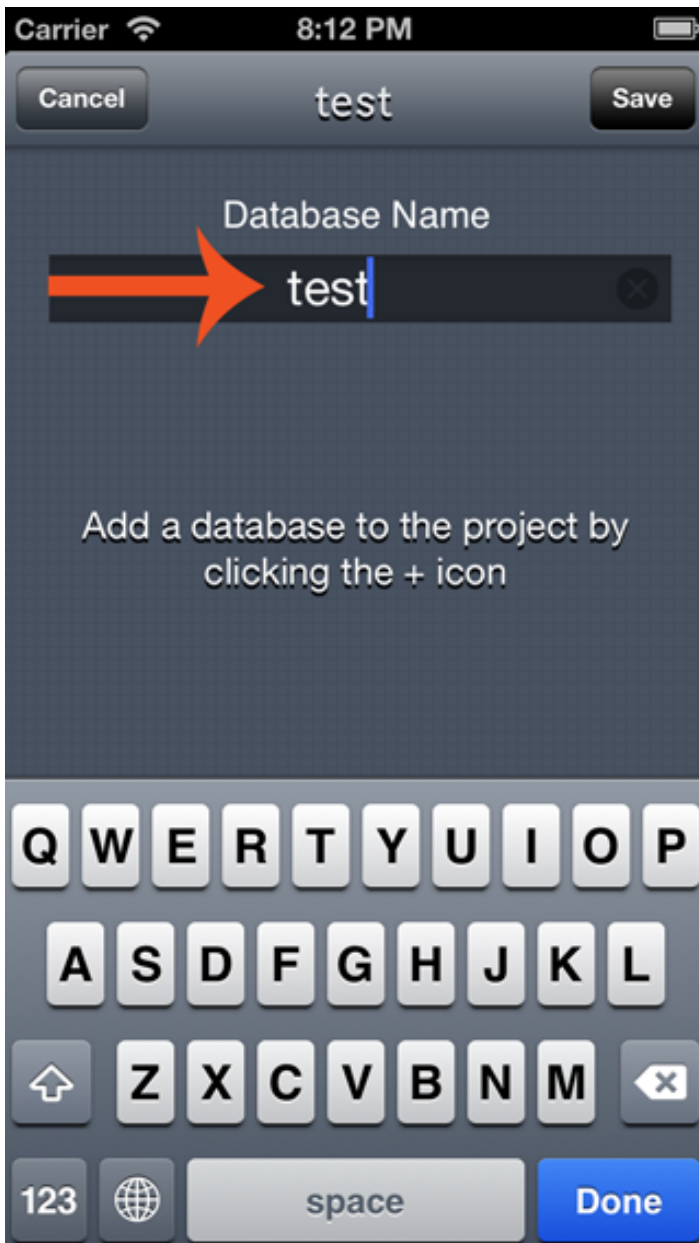

2. Select the project

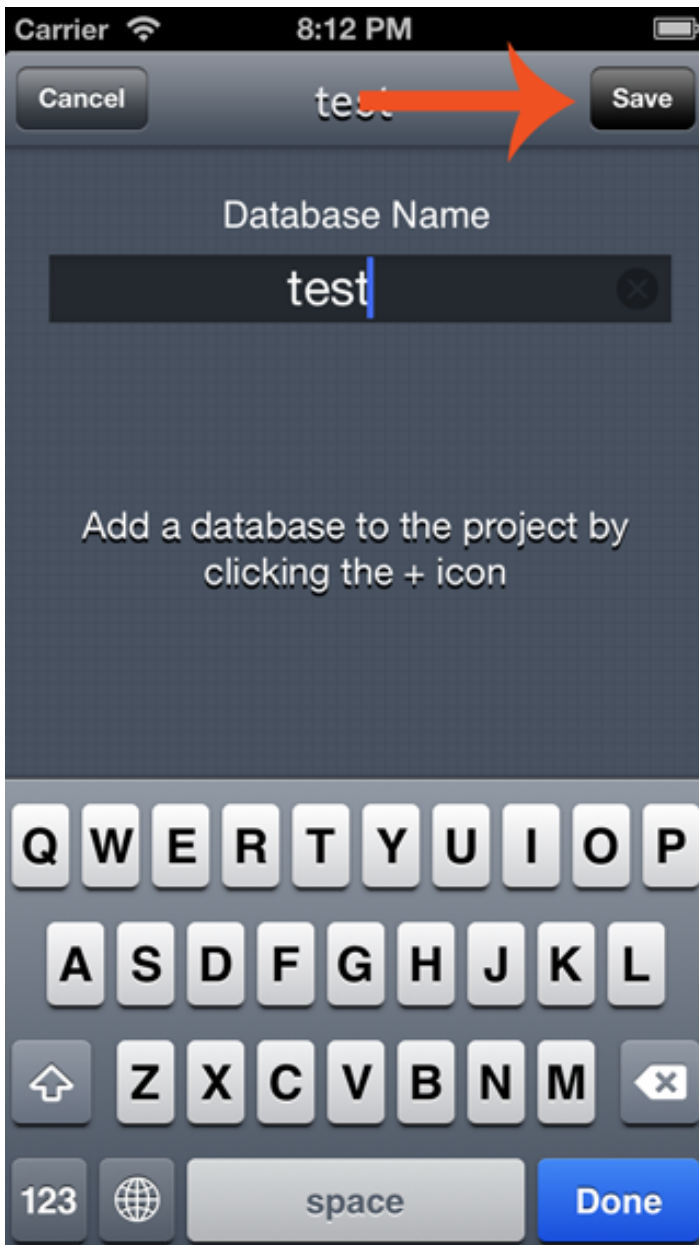

3. Create a database

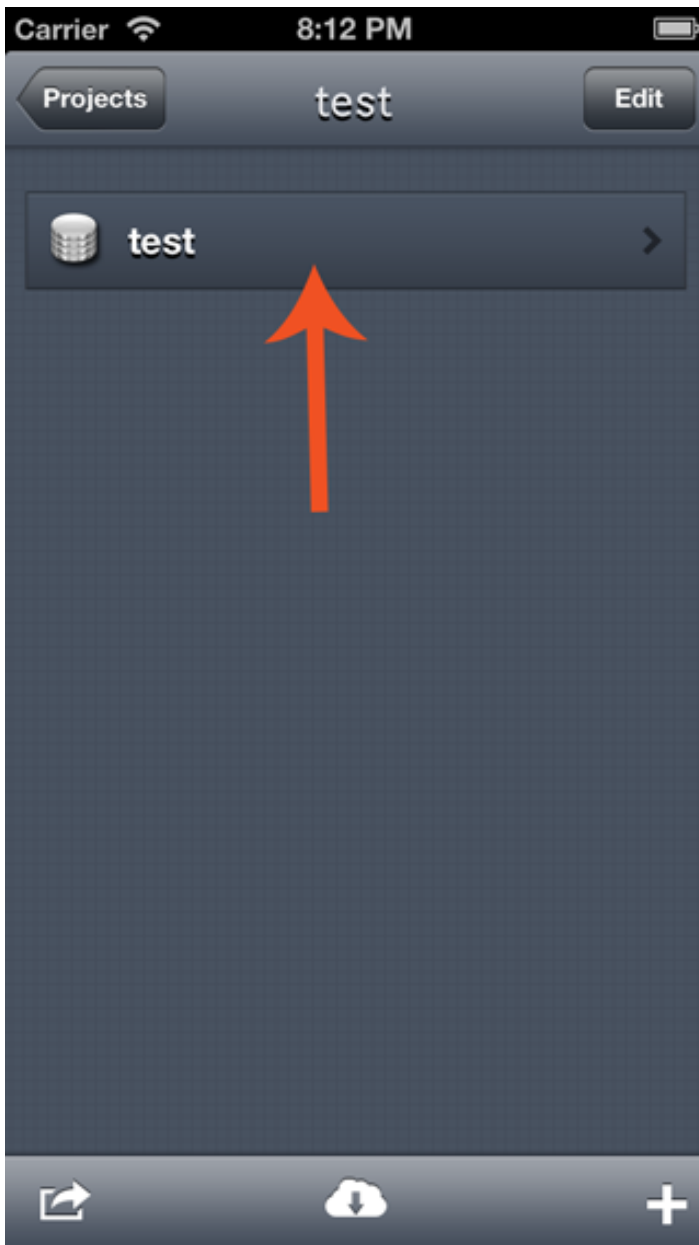

Tap on the + icon on the bottom right of the Screen and follow the same procedure you did for the project

Add a database to the project by clicking the + icon

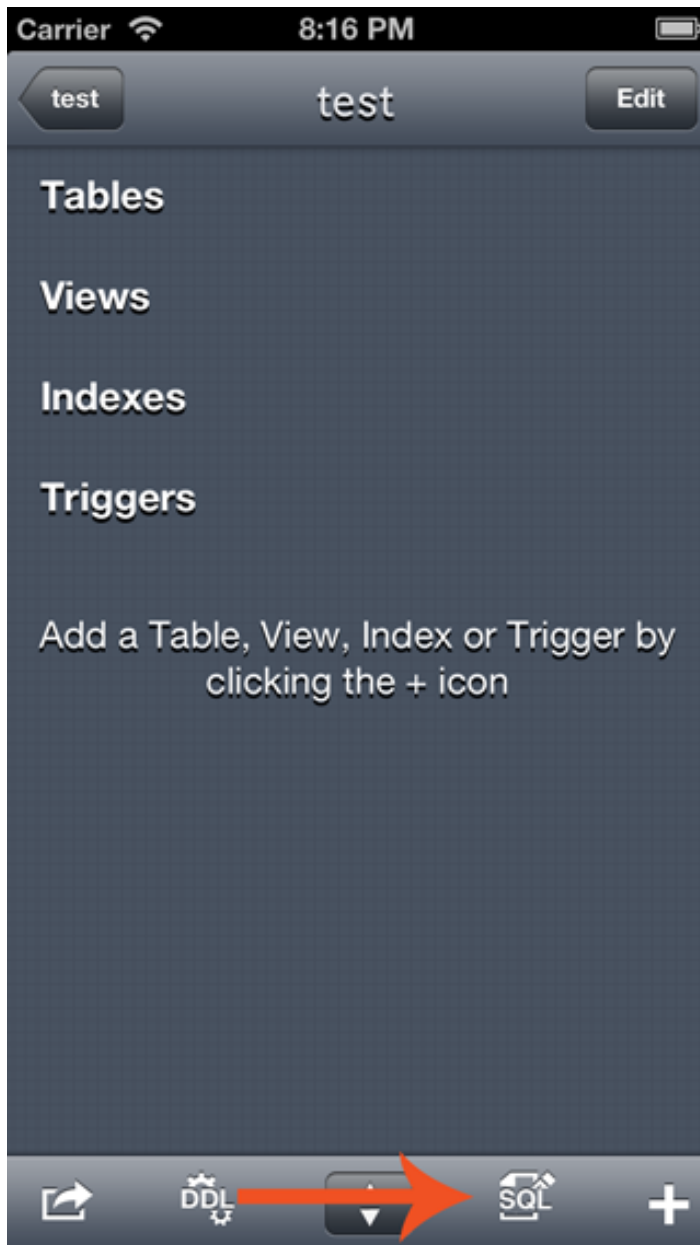

4. Select the database

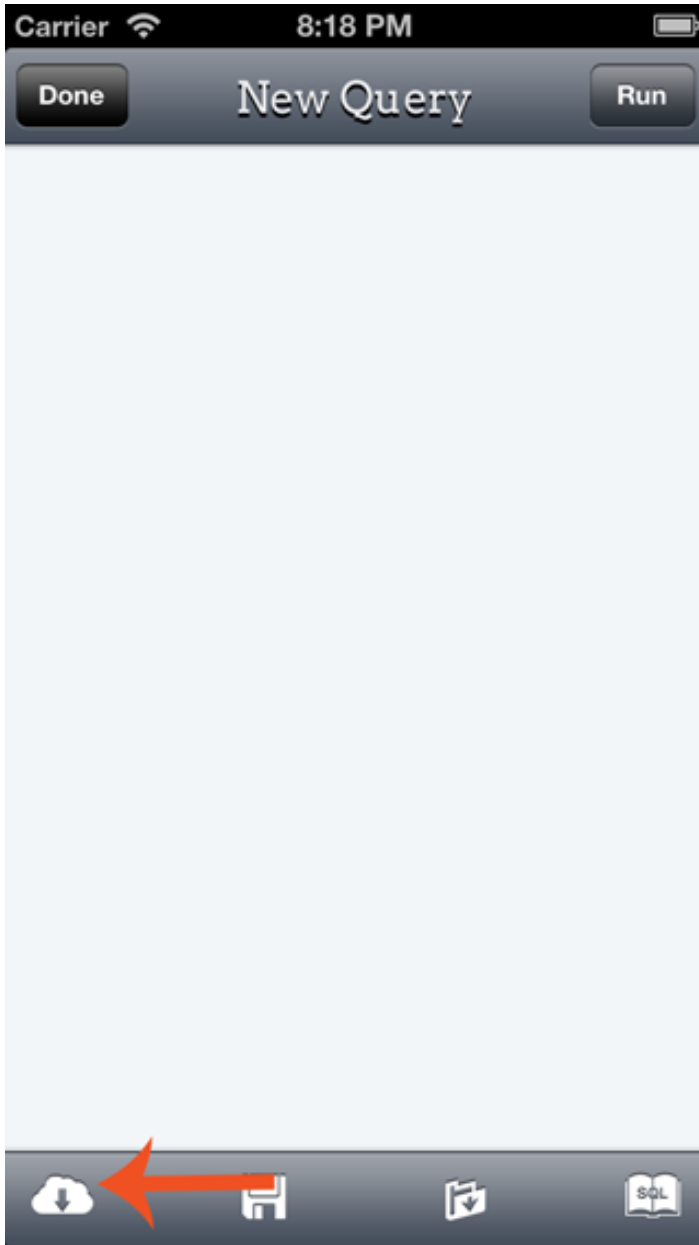

5. Open the SQL Editor.
Tap on the SQL Editor icon (The second from right)

6. Import the SQL Scripts

You can either import scripts from Dropbox/Box or from iTunes.

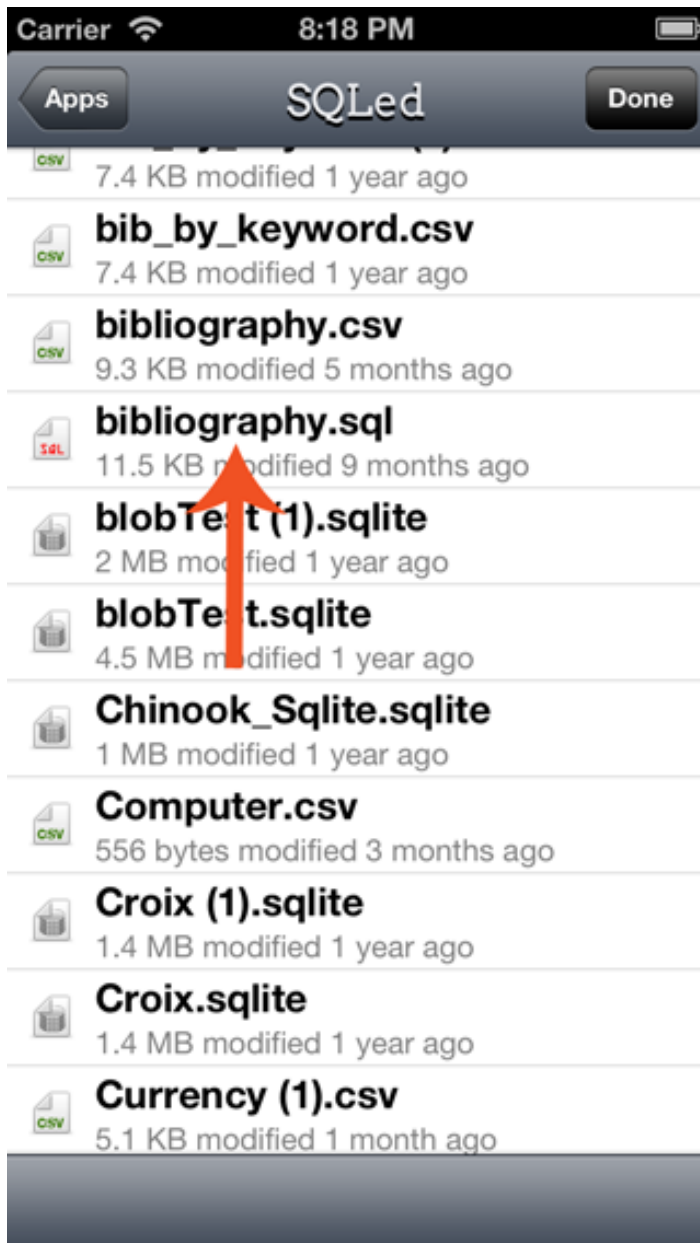

If you want to import from Dropbox/Box tap on the cloud icon in the bottom left corner of the screen.

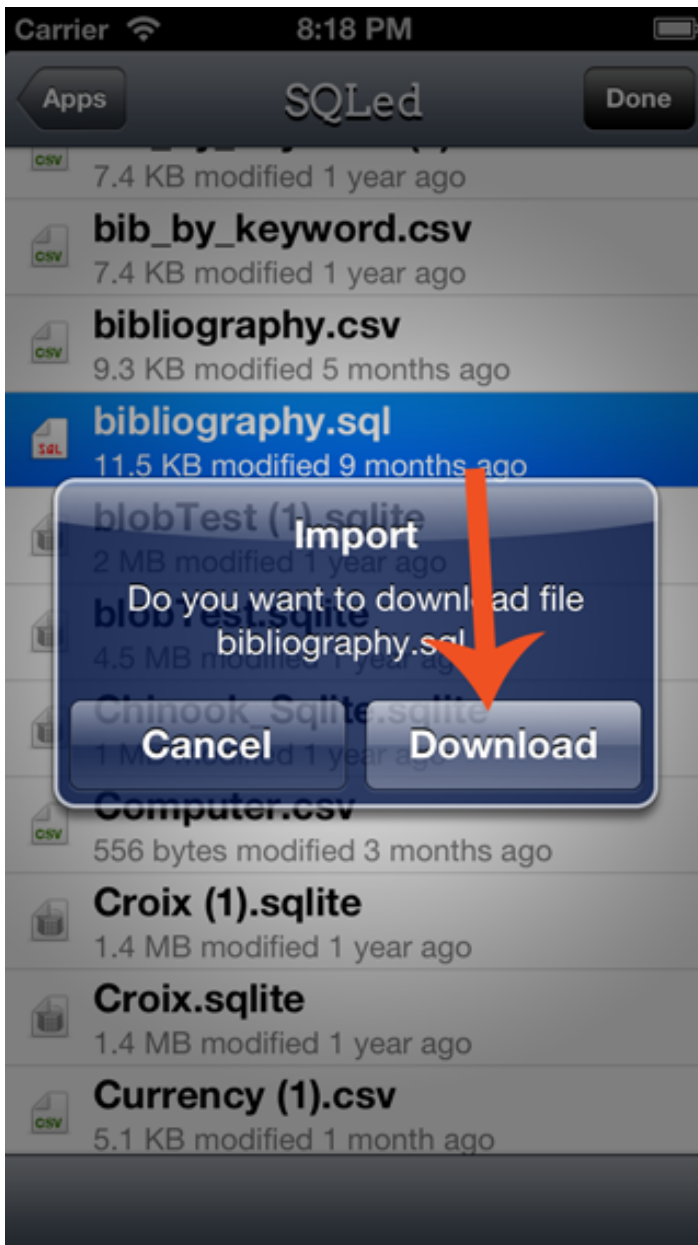

Select Dropbox or Box

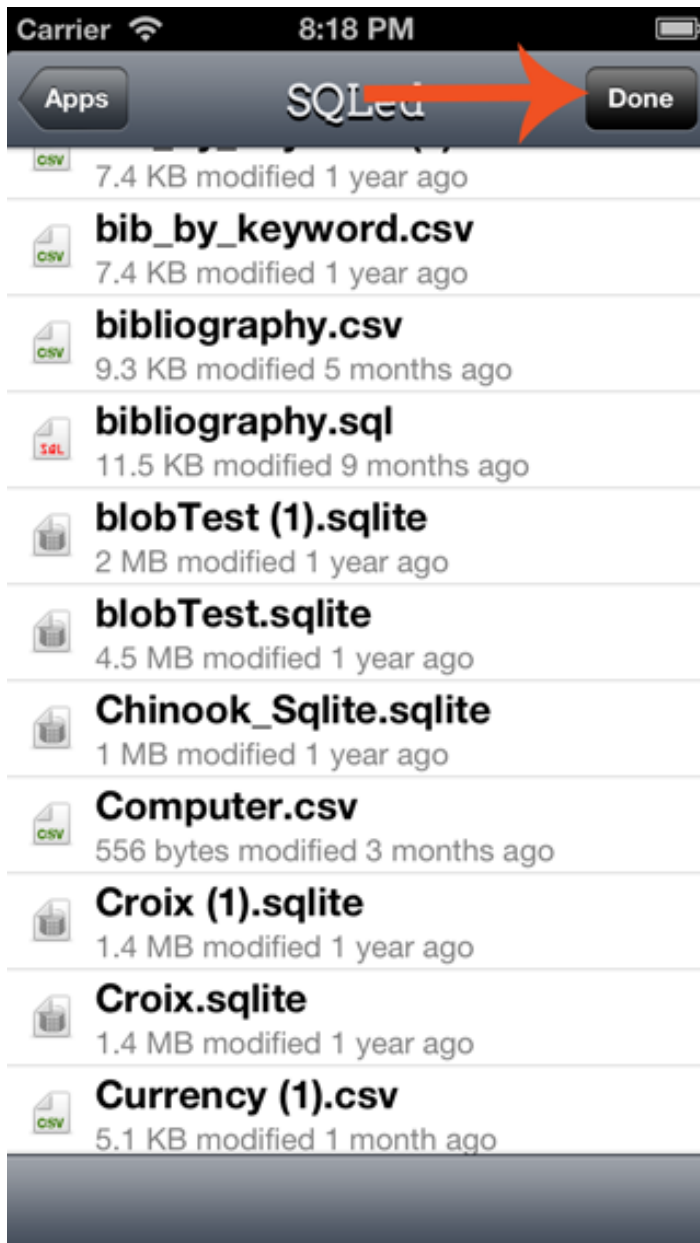

Select the file you want to download (sql files only)

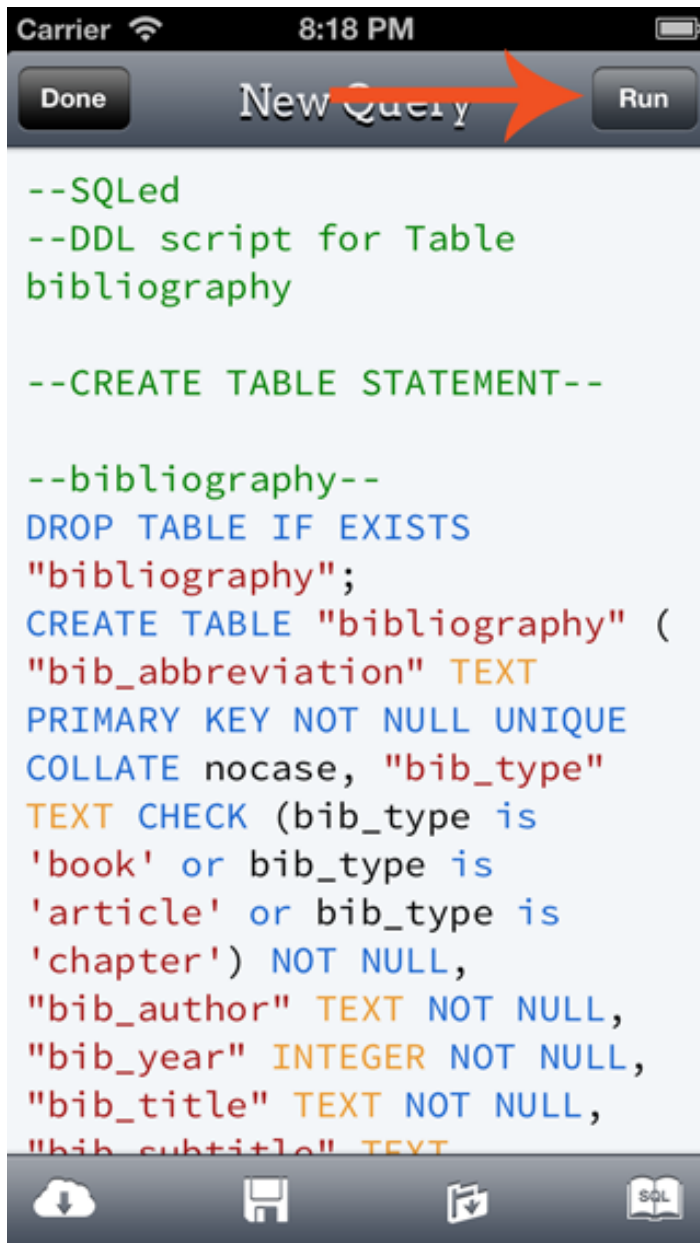

Tap on download

As soon as the download is complete tap on the Done button

7. Run the Script.
Tap on the run button

8. If you want to import from iTunes tap on the second from the right icon and follow the same procedure as above.

Done

New Query

Run
